Meal Plan Pricing & Packaging Guide

How to Price Nutrition Coaching, Bundle with Training, and Create Recurring Revenue

EvoFit Meals

How to Price Nutrition Coaching, Build Team Rate Sheets, Forecast Revenue, and Create Enterprise Contract Templates

Before You Read This

Most trainers who add nutrition services either undercharge dramatically (because they feel like meal plans "aren't worth that much") or price randomly (because they copied someone on Instagram without understanding the math). Both lead to the same place: frustration, burnout, and eventually dropping the service.

At the enterprise level, the pricing challenge compounds. You are not just pricing for one coach and a handful of clients. You are building rate sheets for a team, projecting revenue across multiple locations, calculating profit margins by service type, and negotiating contract pricing with corporate wellness buyers and franchise partners. Gut-feel pricing doesn't work here. You need a system.

This guide walks you through the individual pricing calculator, regional benchmarks, three ready-to-use package templates, pricing psychology, recurring revenue architecture, team and studio rate sheets, revenue forecasting models, profit margin analysis, ROI calculators, enterprise contract templates, and volume discount frameworks.

Section 1: The Pricing Calculator

Step 1: Know Your Time Investment Per Client

Before you set a price, you need to know what each nutrition client actually costs you in time.

Initial setup (first week): TaskTime Review dietary questionnaire and forms15-20 min Calculate macros and calorie targets10-15 min Build meal plan in EvoFit Meals15-30 min Review and customize plan10-15 min Deliver plan and explain it to client15-20 min **Total initial setup65-100 min Monthly ongoing:** TaskTime Plan updates/adjustments (2-4 per month)20-40 min Monthly check-in call20-30 min Responding to questions/messages15-30 min Progress review and macro adjustment10-15 min **Total monthly maintenance65-115 min**

So a nutrition client costs you roughly 1-2 hours per month after the initial setup. That is the denominator in your pricing equation.

Step 2: Calculate Your Minimum Hourly Value

You already know your training session rate. Use that as your benchmark.

If your training rate is $80/session (60 minutes): Your minimum hourly value is $80. **If your nutrition work takes 1.5 hours/month per client:** Your minimum nutrition price is $80 × 1.5 = **$120/month**.

That is your floor. Go below it and you are earning less per hour for nutrition work than for training — which means every hour spent on nutrition is an hour you could have earned more training someone.

Step 3: Add Your Value Premium

Your floor is based on time. But nutrition services deliver value beyond your time:

- ☐ **The plan itself has intellectual value.** You calculated macros, selected recipes, built a structure. That knowledge and customization is worth something independent of the minutes it took.
- ☐ **Convenience value.** The client doesn't have to research, plan, shop, or figure anything out. You've eliminated hours of their weekly decision-making.
- ☐ **Outcome value.** Better nutrition leads to better results, which leads to longer client retention, which leads to more training revenue. The nutrition service makes your training service more valuable.

Add 25-50% above your floor to account for this value.

Using the example above: $120 floor x 1.35 = **$162/month** → round to **$165 or $175/month**

Step 4: Validate Against Your Market

Before finalizing, check what others in your area and niche are charging for nutrition services. Here's how:

- ☐ **1.** Search "[your city] nutrition coaching" and note the top 5 prices
- ☐ **2.** Check what online nutrition coaches in your niche charge
- ☐ **3.** Ask in trainer communities what others charge for meal plans
- ☐ **4.** Look at nutrition apps and meal plan delivery services for the "automated" baseline

Section 2: Regional Benchmarks

These benchmarks are for personal trainers offering nutrition services, not registered dietitians or clinical nutritionists. Clinical rates are typically 20-40% higher.

Major Metro Markets (New York, LA, San Francisco, Chicago, Miami, Boston, Seattle, DC)

ServiceTypical RangePremium Range One-off meal plan (no ongoing)$150 - $300$300 - $500 Monthly meal plan service$150 - $300/month$300 - $500/month Monthly nutrition coaching (plan + check-ins)$200 - $400/month$400 - $700/month Training + nutrition bundle add-on$100 - $200/month on top of training$200 - $350/month

Mid-Size Cities (Denver, Austin, Nashville, Portland, Minneapolis, Atlanta, Phoenix, Charlotte)

ServiceTypical RangePremium Range One-off meal plan (no ongoing)$100 - $200$200 - $350 Monthly meal plan service$100 - $200/month$200 - $350/month Monthly nutrition coaching (plan + check-ins)$150 - $300/month$300 - $500/month Training + nutrition bundle add-on$75 - $150/month on top of training$150 - $250/month

Small Cities and Rural Areas

ServiceTypical RangePremium Range One-off meal plan (no ongoing)$75 - $150$150 - $250 Monthly meal plan service$75 - $150/month$150 - $250/month Monthly nutrition coaching (plan + check-ins)$100 - $200/month$200 - $350/month Training + nutrition bundle add-on$50 - $100/month on top of training$100 - $175/month

Online-Only Nutrition Services

ServiceTypical RangeNotes One-off custom meal plan$75 - $200Single delivery, no ongoing support Monthly plan + messaging support$100 - $250/monthMost common online model Monthly plan + weekly check-ins$200 - $400/monthHigher touch, higher retention Group nutrition coaching (4-8 clients)$50 - $100/month per personLower per-client rate but scalable

Factors That Push Your Price Up

- ☐ Nutrition certification (Precision Nutrition, ISSA Nutrition, NASM CNC)
- ☐ Specialization (sports nutrition, contest prep, gut health, hormonal nutrition)
- ☐ Proven client results with documented outcomes
- ☐ Private studio or premium brand positioning
- ☐ Personalized macro adjustments (not just template plans)
- ☐ Integration with training program (synced periodization)

Factors That Push Your Price Down

- ☐ No nutrition-specific credential
- ☐ Template-based plans with minimal customization

Section 3: Three Package Templates

Package 1: The One-Off Meal Plan

What it is: A single, customized meal plan delivered as a one-time purchase. No ongoing coaching, no monthly check-ins. The client gets their plan and runs with it. **Best for:** Clients on a budget, clients who want to "try before they commit," or as a lead-in product for your monthly service. **What's included:**

- [ ] Initial questionnaire and preference review
- [ ] 7-day customized meal plan (built in EvoFit Meals)
- [ ] Full recipes with portions and macro breakdowns
- [ ] Consolidated shopping list
- [ ] Meal prep guide for the week
- [ ] One round of revisions within 7 days

Pricing formula: Your hourly rate x 2 hours (average time to build and deliver) **Example pricing:**

- [ ] Small market: $100 - $150
- [ ] Mid market: $150 - $250
- [ ] Major metro: $200 - $350

Package 2: Monthly Nutrition Service

What it is: Ongoing customized meal plans with regular updates and a monthly check-in. This is your bread-and-butter nutrition product. **What's included:**

- [ ] Initial questionnaire, preference survey, and allergy review
- [ ] Bi-weekly customized meal plans (new plan every 2 weeks)
- [ ] Full recipes, macros, and shopping lists with every plan
- [ ] One 30-minute monthly nutrition check-in (video, phone, or in-person)
- [ ] Messaging support for quick questions (24-hour response time)
- [ ] Macro adjustments based on progress
- [ ] Plan swaps and modifications as needed

Pricing formula: Your hourly rate x 1.5 hours/month x 1.35 value premium **Example pricing:**

- [ ] Small market: $100 - $175/month
- [ ] Mid market: $150 - $275/month

Section 4: Pricing Psychology

The Anchor Effect

Always present your packages in this order:

- ☐ **1. One-off plan** (lowest price, least value)
- ☐ **2. Monthly service** (middle price, best value for most clients) — **this is the one you want them to buy**
- ☐ **3. Training + nutrition bundle** (highest price, maximum value)

Never present just one option. A single option creates a yes/no decision. Three options create a "which one?" decision. "Which one?" converts at a dramatically higher rate.

Price Presentation Rules

Rule 1: Always quote the package price, not the per-meal price. Rule 2: State the price once, confidently, and move immediately to value. Rule 3: Never apologize for your price. Rule 4: Use "investment," not "cost."

The Founding Member Play

When launching your nutrition service for the first time, a founding member offer creates urgency and rewards early adopters. Discount no more than 20-25% off your standard rate. Cap at 5-10 spots. Set a 2-3 week deadline.

Section 5: Recurring Revenue Architecture

Why Recurring Beats One-Off

Monthly model compounding example:

- [ ] Month 1: 4 clients at $150/month = $600
- [ ] Month 2: 4 existing + 3 new = 7 clients = $1,050
- [ ] Month 3: 7 existing + 3 new = 10 clients = $1,500
- [ ] Month 6: ~18 clients (assuming 85% retention) = $2,700
- [ ] Month 12: ~28 clients = $4,200

The Retention Equation

FactorImpact Regular check-ins+40% retention vs. no check-ins Visible results within 30 days+50% retention Plan variety (new recipes regularly)+25% retention Responsive communication+30% retention Training integration (bundled clients)+60% retention

Building Your Recurring Revenue Dashboard

MetricFormulaTarget Monthly Recurring Revenue (MRR)Sum of all active monthly nutrition clientsGrowing month-over-month Client countTotal active nutrition clientsGrowing Average Revenue Per Client (ARPC)MRR / client count$125+ Churn rateClients lost / clients at start of monthUnder 15% Net new clientsNew clients - churned clientsPositive Lifetime Value (LTV)ARPC x average client tenure (months)$750+

Section 6: Team/Studio Rate Sheets

This section is for gym owners and program directors building a standardized pricing structure for a team of nutrition coaches.

Why Standardized Rates Matter

When every coach on your team sets their own prices, three problems emerge:

- ☐ **1.** Clients comparison-shop between coaches within your own facility
- ☐ **2.** Your brand positioning becomes incoherent — one coach charges $75 and another charges $200 for the same service
- ☐ **3.** Revenue forecasting becomes impossible

Standardized rate sheets solve all three problems. Every coach charges the same rate. The brand is consistent. Revenue is predictable.

Team Rate Sheet Template

ServiceClient PriceCoach PayoutBusiness RevenueMargin One-Off Meal Plan$150$75 (50%)$7550% Monthly Meal Plan (basic)$125/mo$50/mo (40%)$75/mo60% Monthly Nutrition Coaching$175/mo$70/mo (40%)$105/mo60% Training + Nutrition Bundle (add-on)$100/mo$40/mo (40%)$60/mo60% Premium Coaching (weekly check-ins)$300/mo$120/mo (40%)$180/mo60% Group Nutrition (per participant)$75/mo$25/mo (33%)$50/mo67% **Coach compensation model:** 40% of nutrition revenue to the coach is industry standard for gym-employed coaches. If coaches are independent contractors, 50-60% is typical. Adjust based on whether the business provides the platform subscription, marketing, and client acquisition.

Multi-Location Rate Consistency

For multi-location operations, maintain identical pricing across all locations with one exception: if you operate in dramatically different markets (e.g., Manhattan and a small suburban town), create a maximum of two pricing tiers:

TierLocationsPricing Adjustment MetroHigh cost-of-living locationsStandard rate RegionalLower cost-of-living locationsStandard rate minus 15-20%

Never create more than two tiers. The administrative overhead of managing three or more pricing tiers across multiple locations is not worth the marginal revenue optimization.

Section 7: Revenue Forecasting Model Walkthrough

Use this model to project nutrition revenue for the next 12 months. It accounts for client acquisition rate, churn, and average revenue per client.

The Model

InputYour NumberExample Starting nutrition clients (Month 0)___0 Monthly new client acquisition rate___5 clients/month Monthly churn rate___%12% Average revenue per client (ARPC)$___$150/month Platform cost per month$___$100/month Coach compensation rate___%40%

12-Month Projection (using example inputs)

MonthNewChurnedActive ClientsMRRCoach CostPlatformNet Revenue 1505$750$300$100$350 2519$1,350$540$100$710 35113$1,950$780$100$1,070 45216$2,400$960$100$1,340 55219$2,850$1,140$100$1,610 65222$3,300$1,320$100$1,880 75324$3,600$1,440$100$2,060 85326$3,900$1,560$100$2,240 95328$4,200$1,680$100$2,420 105330$4,500$1,800$100$2,600 115431$4,650$1,860$100$2,690 125432$4,800$1,920$100$2,780 **Year 1 totals (example):**

- [ ] Total MRR by Month 12: $4,800
- [ ] Annualized nutrition revenue: ~$38,250
- [ ] Total coach compensation: ~$15,300
- [ ] Total platform costs: $1,200
- [ ] **Net revenue to business: ~$21,750**

Three Scenarios

Run the model at three levels:

ScenarioAcquisition RateChurn RateYear 1 Net Revenue **Conservative**3 clients/month15% churn~$10,000 **Moderate**5 clients/month12% churn~$21,750 **Aggressive**8 clients/month10% churn~$45,000

The difference between conservative and aggressive is almost entirely driven by acquisition rate and churn reduction. If you can acquire one more client per month and reduce churn by 2 percentage points, the annual impact is substantial.

Section 8: Profit Margin Calculator

Calculate your actual profit margin per nutrition client by service type.

Per-Client Margin by Service Type

ServiceMonthly RevenueCoach Time (hrs)Coach Cost ($35/hr)Platform CostGross ProfitMargin % One-Off Plan (amortized)$150 (one-time)2.0$70$8$7248% Basic Monthly$1251.0$35$8$8266% Standard Coaching$1751.5$53$8$11465% Premium Coaching$3002.5$88$8$20468% Bundle Add-On$1000.75$26$8$6666% Group (per person, 6 ppl)$750.33$12$1.33$6282% **Key insight:** Group nutrition has the highest margin because coach time is distributed across multiple participants. If you are looking to maximize profitability, build group programs as a core offering.

Break-Even Analysis

How many clients do you need to cover your fixed costs?

Fixed CostMonthly Amount Platform subscription$100 Marketing budget$500 Admin/intake coordinator (part-time)$1,000 Insurance/professional liability$50 **Total monthly fixed costs$1,650 Break-even calculation:**

- ☐ Average gross profit per client (Standard Coaching): $114/month
- ☐ Break-even clients: $1,650 / $114 = **15 clients**

At 15 clients, your nutrition program covers all its costs. Every client after 15 is pure profit contribution.

Section 9: Nutrition Service ROI Calculator

Use this when pitching nutrition services to gym owners, corporate partners, or your own leadership team.

ROI for Gym Owners Adding Nutrition

MetricWithout NutritionWith NutritionImpact Average member tenure8 months12 months+50% retention Monthly revenue per member$150 (training only)$225 (training + nutrition)+50% ARPU Annual revenue per member$1,200$2,700+125% Member lifetime value$1,200$2,700+$1,500 per member For 100 members at 30% adoption-30 clients x $75/mo nutrition+$2,250/mo Annual nutrition revenue (30 clients)$0$27,000New revenue stream Retention savings (reduced churn)-~$18,000/year (15 fewer cancellations x $1,200 LTV)Cost avoidance **Total annual impact-~$45,000**Revenue + retention

ROI for Corporate Wellness

InvestmentCost Program fee (50 employees x $50 PEPM)$30,000/year Admin time (HR coordinator, 2 hrs/month)$2,400/year **Total investment$32,400/year** ReturnValue Healthcare cost reduction (15% on $5,000/employee/year, 50 employees)$37,500/year Reduced absenteeism (1.5 fewer sick days x $250/day x 50)$18,750/year Productivity improvement (estimated 3% on $60,000 avg salary x 50)$90,000/year **Total estimated return$146,250/year ROI:** ($146,250 - $32,400) / $32,400 = **351%**

Present these numbers to corporate buyers. Even if they discount the estimates by half, the ROI is still compelling.

Section 10: Enterprise Contract Pricing Templates

Use these templates when negotiating contracts with gyms, corporate clients, franchises, and institutions.

Template A: Gym Partnership Contract Pricing

ServicePer-Client RateRevenue Share Basic meal plans (coach-delivered)$100/mo per client50% gym / 30% coach / 20% platform provider Full nutrition coaching$175/mo per client50% gym / 30% coach / 20% platform provider Premium coaching$300/mo per client45% gym / 35% coach / 20% platform provider Group nutrition programs$75/mo per participant55% gym / 25% coach / 20% platform provider **Minimum commitment:** 6 months **Performance clause:** If nutrition adoption drops below 15% of total membership for 2 consecutive months, either party may renegotiate terms. **Staff training included:** One 60-minute training session per quarter, plus onboarding training for new coaches.

Template B: Corporate Wellness Contract Pricing

TierDescriptionPer-Employee-Per-Month (PEPM) Tier 1: Library AccessSelf-service meal plan library, general nutrition resources$15 PEPM Tier 2: CoachedPersonalized plans + monthly check-in per employee$75 PEPM Tier 3: PremiumWeekly coaching, VIP support, executive nutrition$200 PEPM **Volume discounts:** Enrolled EmployeesDiscount 1-25Standard rate 26-5010% discount 51-10015% discount 101-25020% discount 250+Custom negotiation **Contract terms:**

- ☐ Minimum commitment: Quarterly (3 months)
- ☐ Billing: Monthly, net 30
- ☐ Reporting: Quarterly utilization and satisfaction reports
- ☐ Data privacy: HIPAA-compliant data handling, no sharing of individual employee data with employer

Template C: Franchise System Pricing

ComponentCost Initial setup per location (platform, training, materials)$500 one-time Monthly platform license per location$150/month Revenue share on nutrition services15% of gross nutrition revenue Annual franchise nutrition summit (optional)$250 per location **Performance incentives:**

- ☐ Locations achieving 25%+ nutrition adoption: Revenue share drops to 12%
- ☐ Locations achieving 35%+ nutrition adoption: Revenue share drops to 10%
- ☐ Top-performing location each quarter: Featured in franchise marketing materials

Section 11: Volume Discount Frameworks

When to offer volume discounts and how to structure them without eroding your margins.

The Golden Rules of Volume Discounts

- ☐ **1. Never discount below your cost floor.** Calculate your minimum price per client (coach cost + platform cost + overhead allocation) and never go below it, regardless of volume.
- ☐ **2. Discount the rate, not the service.** The client gets the same quality plan and coaching at a lower rate — you never reduce the service to hit a lower price point.
- ☐ **3. Require commitment in exchange for discount.** Volume discounts are earned through longer commitments or guaranteed minimums, not given upfront on hope.
- ☐ **4. Cap your maximum discount at 25%.** Beyond 25% off your standard rate, you are better off saying no. The client who negotiates you down 40% will be the first to complain about the quality they paid a premium for.

Volume Discount Schedule

For individual clients purchasing multiple months: CommitmentDiscountEffective Price (at $175 standard) Month-to-month0%$175/month 3-month commitment10%$157.50/month 6-month commitment15%$148.75/month 12-month commitment20%$140/month **For B2B clients purchasing multiple seats:** SeatsDiscountNotes 1-100%Standard rate 11-2510%Requires 3-month minimum commitment 26-5015%Requires 6-month minimum commitment 51-10020%Requires 6-month minimum + quarterly review 100+25% (maximum)Custom contract, annual commitment preferred

Handling Discount Requests

When a prospect asks for a discount, don't immediately concede. Use this framework:

> **Prospect:** "Can you do better on the price?"

>

> **You:** "The rate I quoted reflects the full service — customized plans, coaching, ongoing adjustments, and platform access. I can offer a reduced rate if you're willing to commit to a longer term. For a 6-month commitment, I can bring it down to $[X]/month. That locks in your rate and guarantees your spot. Would that work?"

If they push further:

> **YOU**
>
> "I want to be honest — I'd rather deliver a great service at this rate than cut corners to hit a lower number. What I can do is start with a 30-day trial at the standard rate, and if you're happy with the

Section 12: Common Pricing Mistakes

Mistake 1: Pricing Based on How Long the Plan Takes to Generate

With EvoFit Meals, you can generate a complete meal plan in minutes. That doesn't mean the plan is worth "5 minutes of work." Price on value, not on production time.

Mistake 2: Matching App Prices

You are not an app. Don't address the comparison unless the client brings it up.

Mistake 3: Free Nutrition "Included" with Training

This devalues the service and makes it impossible to charge for it later.

Mistake 4: Annual Discounts That Kill Cash Flow

Offer modest 3-month or 6-month discounts (10-15%) instead of large annual ones.

Mistake 5: Not Raising Prices

Review and raise prices every 12 months. Existing clients get 30 days notice and a loyalty lock-in option.

Mistake 6: Inconsistent Pricing Across Coaches (Enterprise)

Every coach charges the same rate. Period. Internal price competition destroys your brand.

Mistake 7: Underpricing Enterprise Contracts

Corporate and franchise contracts should be priced at a premium to individual rates — not a discount. The administrative overhead, reporting requirements, and coordination effort are higher. If anything, your per-client rate for enterprise should be 10-20% above your standard rate before volume discounts.

Your Pricing Worksheet

Fill this in now.
