Nutrition Retention & Re-engagement Kit

Win-Back Scripts and Re-engagement Sequences for Clients Who Stopped Following Plans

EvoFit Meals

25 Win-Back Scripts, Loyalty Programs, Churn Analysis, 30-Day Drip Sequences, and Community-Building Frameworks for Scaling Client Retention

Why This Kit Exists

You will lose nutrition clients. Some will stop following their plans. Some will cancel. Some will simply go quiet and stop responding to messages. This is normal. The question isn't whether it will happen — it's whether you have a system for bringing them back.

The economics are clear: acquiring a new nutrition client costs 5-7x more than retaining an existing one. A client who returns after a 2-month gap is already onboarded, already trusts you, and already knows how your service works. Re-engagement is the highest-ROI activity in your business.

At the enterprise level, retention becomes a team-wide discipline. Every coach on your team must execute the same retention protocols, flag the same risk signals, and follow the same re-engagement sequences. One coach with poor retention habits drags down the entire program's numbers — and every lost client is revenue your competitors pick up.

This kit gives you 25 scripts covering every departure and retention scenario, a churn analysis worksheet with predictive indicators, a loyalty program blueprint, a full 30-day win-back automation sequence, referral program templates with tiered incentives, a team retention playbook, NPS survey templates, client advisory board setup, 6-month and 12-month programming frameworks, and a community-building guide.

Part 1: The 15 Core Re-engagement Scripts (Scripts 1-15)

Script 1: The Dormant Client

Scenario: The client hasn't cancelled, but they've stopped responding to messages, missed their last check-in, and you suspect they're not following the plan. It's been 2-3 weeks of silence. **Timing:** Send at the 2-week mark. Don't wait longer. **Message:**

Hi [Name],

>

I noticed we haven't connected in a couple of weeks and I wanted to reach out. No judgment, no pressure — life gets busy and I know nutrition isn't always the top priority when things pile up.

>

I just want you to know two things:

>

1. Your plan is still active and I can update it anytime you're ready to pick things back up.

2. If something about the plan wasn't working — the recipes were too complicated, the portions didn't feel right, the timing didn't fit your schedule — I'd genuinely love to hear that.

>

No need for a long reply. Even a thumbs up to let me know you're good would be great.

>

[Your Name]

If they don't respond after 5 more days:

YOU

Part 2: Enterprise Retention Scripts (Scripts 16-25)

Script 16: Churn Analysis Worksheet With Predictive Indicators

Use this monthly to identify clients at risk of leaving before they cancel. Client Churn Risk Assessment: Client NameAdherence Trend (3-month)Check-in Engagement (1-5)Response Time TrendLast Progress WinRisk Score (1-10)Action **Scoring Guide:**

- ☐ Adherence declining + engagement below 3 + slower responses = Risk 7-10 (intervene this week)
- ☐ Adherence stable + engagement 3-4 + normal responses = Risk 3-6 (monitor, add one extra touchpoint)
- ☐ Adherence improving + engagement 4-5 + prompt responses = Risk 1-2 (retain and request referrals)

Monthly churn analysis questions:

- ☐ **1.** How many clients cancelled this month? ___
- ☐ **2.** What was their average tenure? ___ months
- ☐ **3.** Most common exit reason (from exit survey)? ___
- ☐ **4.** Which coach had the most cancellations? ___
- ☐ **5.** Were there any external factors (seasonal, economic, competitor launch)? ___
- ☐ **6.** What percentage of cancelled clients responded to re-engagement within 90 days? ___%

Script 17: Loyalty Program Blueprint

A structured loyalty program that rewards long-term clients and incentivizes continued engagement. Tier Structure: TierQualificationBenefits **Bronze**Active 0-3 monthsStandard service **Silver**Active 4-6 monthsPriority recipe requests, one free plan swap per month **Gold**Active 7-12 months10% loyalty discount, early access to new features, quarterly gift (branded shaker, cookbook, etc.) **Platinum**Active 12+ months15% loyalty discount, direct line to program director, annual nutrition strategy session, first access to group programs **How to implement:**

- ☐ Track client start dates in your CRM or EvoFit Meals notes
- ☐ Notify clients when they advance to a new tier: "Congratulations — you've been with us for 6 months and you've just hit Silver status. Here's what that means..."
- ☐ The tier upgrade message is a retention touchpoint itself — it reinforces their commitment and gives them a reason to stay

Cost analysis:

- ☐ 10% discount on $175/month = $17.50/month per Gold client
- ☐ If the loyalty discount prevents one cancellation per quarter (LTV saved: $175 × 5 months average remaining tenure = $875), the ROI is 50:1

Script 18: Win-Back Automation Sequence (Full 30-Day Drip)

Trigger: Client cancels. This sequence runs automatically (or manually by the coach) for

Client Exit Survey Template

Send within 24 hours of cancellation. **Subject:** Quick question before you go (takes 2 minutes)

Hi [Name],

I respect your decision. Before we wrap up, would you mind answering a few quick questions?

1. What was the primary reason you decided to stop?

- ☐ Budget / cost
- ☐ Not seeing results
- ☐ Plan didn't fit my lifestyle
- ☐ Didn't have time to follow the plan
- ☐ Found another solution
- ☐ No longer a priority
- ☐ Other: _____

2. What did you like most about the service?

_____

3. What would have made you stay?

_____

4. On a scale of 1-10, how likely would you be to return in the future?

1 (not likely) ---- 5 (maybe) ---- 10 (very likely)

5. Would you recommend this service to a friend?

- ☐ Yes
- ☐ No
- ☐ Maybe

6. Anything else?

_____

Plan Adjustment Trigger Checklist

Use at every check-in to catch issues before they become cancellation reasons.

Adherence Signals:

- ☐ Followed the plan 80%+ this month
- ☐ Completed meal prep most weeks
- ☐ Eating the specified meals (not substituting constantly)

Result Signals:

- ☐ Making measurable progress
- ☐ Weight trend moving in intended direction
- ☐ Reports acceptable energy and mood

Satisfaction Signals:

- ☐ Enjoys 70%+ of recipes
- ☐ Feels the plan is manageable
- ☐ Engaged in check-ins

Life Change Signals:

- ☐ Schedule changed
- ☐ Training changed
- ☐ Financial or relationship stress mentioned
- ☐ Household situation changed

The Traffic Light System

StatusMeaningAction **GREEN**Engaged, following plan, making progressContinue. Celebrate wins. **AMBER**Mixed adherence, some concernsOutreach within 48 hours. Adjust plan. Extra check-in. **RED**Not following plan, not responding, wants to cancelImmediate outreach. Offer rebuild, pause, or adjustment. *This guide is part of the EvoFit Meals Business Vault.
