EVOFIT MEALS BUSINESS VAULT

Nutrition Client Onboarding Pack

Dietary Questionnaires, Food Preference Surveys, Allergy Forms, and Welcome Sequences

EvoFit Meals

Dietary Questionnaires, Food Preference Surveys, Allergy Forms, and Welcome Sequences

What This Is

This is everything you need to onboard a new nutrition client professionally. Copy the templates, customize them for your brand, and use them every time a new client signs up. A structured onboarding process does three things: it collects the information you need to build an accurate plan, it sets expectations so the client knows exactly what to expect, and it signals professionalism that justifies your pricing.

Each template in this pack is ready to use. Adjust the wording to match your voice, add your branding, and send them out.

Template 1: Dietary Questionnaire

Send this immediately after a client signs up. It's the foundation for their meal plan. **Dietary Questionnaire** *Please complete this form as thoroughly as possible. Your answers directly shape your meal plan.* **Section A: Personal Information** FieldYour Answer Full name Email Phone Date of birth Gender Height Current weight Goal weight (if applicable) **Section B: Goals and Timeline**

☐ **1.** What is your primary nutrition goal? (Select one)

- [ ] Fat loss
- [ ] Muscle gain
- [ ] Improved energy and performance
- [ ] General health and wellness
- [ ] Sport-specific performance
- [ ] Medical/therapeutic (please specify: _____)

☐ **2.** What is your secondary goal, if any?

_____

☐ **3.** What's your ideal timeline for seeing results?

- [ ] 4 weeks
- [ ] 8 weeks
- [ ] 12 weeks
- [ ] No specific timeline — I want sustainable change

☐ **4.** On a scale of 1-10, how committed are you to following a structured meal plan?

1 (not very) ---- 5 (somewhat) ---- 10 (fully committed) **Section C: Current Eating Habits**

☐ **5.** Describe a typical day of eating for you right now. Be honest — this helps me understand your baseline.

- Breakfast: _____
- Morning snack: _____
- Lunch: _____
- Afternoon snack: _____
- Dinner: _____
- Evening snack: _____

☐ **6.** How many meals do you prefer to eat per day?

- [ ] 2 meals
- [ ] 3 meals
- [ ] 4 meals

Template 2: Food Preference Survey

Send alongside the Dietary Questionnaire. This ensures the meal plan includes foods they'll actually eat. **Food Preference Survey** *The better I know your food preferences, the better your plan will be. No wrong answers here.* **Proteins — Rate each: Love / Like / Neutral / Dislike / Won't Eat** ProteinRating Chicken breast Chicken thighs Turkey Beef (steak, mince) Pork Lamb Salmon White fish (cod, tilapia, etc.) Tuna (canned) Shrimp/prawns Eggs Tofu Tempeh Greek yogurt Cottage cheese Protein powder (whey) Protein powder (plant-based) **Carbohydrates — Rate each: Love / Like / Neutral / Dislike / Won't Eat** CarbRating White rice Brown rice Pasta Bread (white) Bread (whole grain) Oats Potatoes Sweet potatoes Quinoa Couscous Wraps/tortillas Bagels Fruit (list favourites): **Vegetables — Rate each: Love / Like / Neutral / Dislike / Won't Eat** VegetableRating Broccoli Spinach Kale Green beans Peppers (bell) Carrots Zucchini Mushrooms Asparagus Cauliflower Tomatoes Onions Cucumber Avocado **Fats — Rate each: Love / Like / Neutral / Dislike / Won't Eat** Fat SourceRating Olive oil Coconut oil Butter Nuts (almonds, walnuts, etc.) Nut butter (peanut, almond) Cheese Seeds (chia, flax, pumpkin) **Cooking and Lifestyle**

☐ **1.** How much time can you spend on meal prep per week?

- [ ] Less than 1 hour
- [ ] 1-2 hours
- [ ] 2-3 hours
- [ ] 3+ hours
- [ ] I enjoy cooking and don't mind spending time

☐ **2.** How confident are you in the kitchen?

- [ ] Beginner (I can follow simple recipes)
- [ ] Intermediate (comfortable with most cooking techniques)
- [ ] Advanced (I enjoy cooking and experimenting)

☐ **3.** Do you have access to the following? (Check all that apply)

- [ ] Oven
- [ ] Stovetop
- [ ] Microwave
- [ ] Slow cooker / Instant Pot
- [ ] Blender
- [ ] Air fryer
- [ ] Grill / BBQ

☐ **4.** What's your monthly grocery budget? $_____

Template 3: Allergy and Intolerance Disclosure Form

This is a safety document. Use it with every client. Keep it on file. **Allergy and Intolerance Disclosure Form Client Name: _____ Date: _____**

Please indicate any food allergies, intolerances, or sensitivities you have. This information is critical for building a safe meal plan.

Known Allergies (anaphylactic or medically diagnosed): AllergenAllergy?Severity Peanuts[ ] Yes [ ] No Tree nuts (specify: _____)[ ] Yes [ ] No Shellfish[ ] Yes [ ] No Fish[ ] Yes [ ] No Eggs[ ] Yes [ ] No Dairy / Lactose[ ] Yes [ ] No Wheat / Gluten[ ] Yes [ ] No Soy[ ] Yes [ ] No Sesame[ ] Yes [ ] No Other (specify):[ ] Yes [ ] No **Food Intolerances or Sensitivities (non-allergic but cause discomfort):** _____

Dietary Restrictions (religious, ethical, or personal):

- ☐ Vegetarian
- ☐ Vegan
- ☐ Pescatarian
- ☐ Halal
- ☐ Kosher
- ☐ Other: _____

Current dietary supplements: _____

Medications that interact with food (e.g., blood thinners and vitamin K, MAO inhibitors and tyramine-containing foods): _____

Acknowledgment:

I confirm that the information provided is accurate to the best of my knowledge. I understand that [Your Name / Business Name] provides general nutrition guidance and customized meal planning, not medical nutrition therapy. If I have a medical condition requiring dietary management, I will consult with a registered dietitian or physician.

I will inform [Your Name / Business Name] immediately if my allergy, intolerance, or medical status changes.

Signature: _____ Date: _____

Important: Keep this form on file for every client. If a client reports a serious food allergy, take extra care to flag it in your EvoFit Meals client profile. The platform allows you to set dietary restrictions per client — use this feature for every allergy and intolerance reported here.

Template 4: Day-1 Welcome Email

Send this within 2 hours of a client signing up. Speed signals professionalism. **Subject:** Welcome to [Your Nutrition Service Name] — Here's What Happens Next

Hi [Name],

Welcome aboard. I'm genuinely excited to help you reach [their stated goal].

Here's exactly what happens over the next few days:

Today:

- ☐ **1.** You'll receive a Dietary Questionnaire (takes about 10 minutes)
- ☐ **2.** You'll receive a Food Preference Survey (takes about 5 minutes)
- ☐ **3.** You'll receive an Allergy/Intolerance Disclosure Form (takes about 3 minutes)

Please complete all three as soon as possible — the more detail you provide, the better your plan will be.

Within 48 hours of receiving your completed forms:

I'll build your first customized meal plan using EvoFit Meals. Your plan will include:

- ☐ [X] days of meals tailored to your goals and preferences
- ☐ Full recipes with step-by-step instructions
- ☐ Macro and calorie breakdowns for every meal
- ☐ A complete shopping list

At our first check-in ([date/time]):

We'll review your plan together, make any adjustments, and I'll walk you through the meal prep strategy for your first week.

How to reach me:

- ☐ For quick questions: [your preferred messaging method]
- ☐ For plan adjustments or concerns: [email or platform message]
- ☐ Response time: I aim to respond within [X hours] during business hours

One important note: Your meal plan is designed for your general health and fitness goals. If you have any medical conditions that affect your diet, please make sure you've shared those in your forms and continue working with your healthcare provider. I'm happy to coordinate with them if needed.

I'm looking forward to working with you. Let's make this the last time you have to figure out what to eat.

[Your Business Name]

Template 5: What to Expect — Client Guide

Include this as a PDF or link in your welcome email. It sets expectations and reduces support questions. **What to Expect: Your Nutrition Service Guide Welcome.** This guide tells you everything you need to know about how your nutrition service works, what you'll receive, and how to get the most out of it. **What You'll Receive** DeliverableFrequencyFormat Customized meal planWeekly or bi-weekly (based on your package)Digital — accessible through EvoFit Meals Recipes with instructionsIncluded in every planStep-by-step with portions Macro/calorie breakdownEvery meal, every dayBuilt into your plan Shopping listEvery plan cycleConsolidated and organized by section Nutrition check-inMonthly (or as per your package)Video call, phone, or in-person Plan adjustmentsAs needed based on progressRequested through [your contact method] **How Your Plan Is Built**

Your meal plan is created using EvoFit Meals, a professional nutrition platform. Here's the process:

- ☐ **1.** I review your questionnaire, preferences, and restrictions
- ☐ **2.** I calculate your calorie and macro targets based on your goals, activity level, and body composition
- ☐ **3.** I generate a plan that matches your preferences, cooking skills, and schedule
- ☐ **4.** I review every plan personally before it reaches you — no generic output
- ☐ **5.** You receive the plan with full recipes, portions, and a shopping list

If something doesn't work — a recipe you hate, an ingredient you can't find, a day that doesn't fit your schedule — tell me and I'll adjust it. The plan should serve you, not the other way around.

How to Get the Best Results

- ☐ **1. Follow the plan for at least 5 full days before requesting changes.** Give your body and your routine a chance to adapt. Minor discomfort in the first few days (cravings, adjustment to new foods) is normal.
- ☐ **2. Prep what you can.** You don't need to prep every meal, but having 2-3 days of lunches ready to go dramatically improves adherence. Your plan includes prep-friendly meals for this reason.
- ☐ **3. Track your intake for the first 2 weeks.** Even rough tracking helps you build awareness of portions. After 2 weeks, most clients can eyeball portions accurately.
- ☐ **4. Communicate honestly.** If you skip meals, eat off-plan, or have a rough week — tell me. I'm not here to judge. I'm here to adjust. A plan that accounts for real life works better than a perfect plan you can't follow.
- ☐ **5. Ask questions.** There are no dumb questions in nutrition. If you don't understand why a food is in your plan, or you want to swap something, or you're confused about a recipe — ask.

What to Do If... SituationWhat to Do You hate a recipeMessage me — I'll swap it within 24 hours You can't find an ingredientSubstitute with something similar or message me for an alternative You're eating outChoose the closest match from your plan's macros. A photo of the menu helps — send it and I'll suggest the best option You're travelingLet me

Template 6: 7-Day Welcome Email Sequence

Set this up as an automated drip sequence or send manually. These 7 emails guide the client through their first week, build confidence, and prevent early drop-off.

Email 1: Day 0 — Welcome and Setup (Send immediately after sign-up)

Subject: You're in! Here's your first step.

Hi [Name],

Welcome to [Your Nutrition Service Name]. I'm genuinely excited to work with you on [their stated goal].

I've just sent you three quick forms — a dietary questionnaire, a food preference survey, and an allergy disclosure form. Completing these is the most important thing you can do today. The more detail you give me, the more personalized your plan will be.

Your one action for today: Complete all three forms. Total time: about 18 minutes.

Once I have your forms back, I'll start building your customized plan. You'll have it within 48 hours.

Talk soon,

[Your Name]

Email 2: Day 1 — Setting Expectations

Subject: What to expect this week (and what NOT to expect)

Hi [Name],

Before your plan arrives, I want to set some expectations so you're not caught off guard:

What to expect:

- ☐ A detailed meal plan with breakfast, lunch, dinner, and snacks mapped out
- ☐ Full recipes with macro breakdowns and a consolidated grocery list
- ☐ A plan that includes foods you actually like (that's why the preference survey matters)

What NOT to expect:

- ☐ Perfection on Day 1. Your first week is about getting familiar with the plan, not executing it flawlessly
- ☐ Dramatic results in 7 days. Sustainable change happens over weeks, not days
- ☐ A "diet" that requires you to eat boring food. If your plan has boring meals, that's my fault — tell me and I'll fix it

Your one action for today: If you haven't finished the forms yet, please complete them now so I can start building your plan.

[Your Name]

Email 3: Day 2 — Plan Delivery

Subject: Your meal plan is ready — here's how to use it

Hi [Name],

Your custom meal plan is live in your EvoFit Meals dashboard. Here's how to make the most of it:

Template 7: Macro Goal-Setting Worksheet

Give this to clients who want to understand the "why" behind their numbers. It builds buy-in for the plan. **Your Macro Goal-Setting Worksheet Name: _____ Date: _____ Current Weight: _____** lbs/kg **Goal Weight (if applicable): _____** lbs/kg **Primary Goal: _____ Step 1: Your Daily Calorie Target**

Your daily calorie target is calculated based on your Basal Metabolic Rate (the calories your body burns at rest) multiplied by your activity level, then adjusted for your goal.

Your NumbersValue BMR (calculated by your coach)_____ cal Activity multiplierx _____ Total Daily Energy Expenditure (TDEE)_____ cal Goal adjustment (deficit/surplus/maintenance)_____ cal **Your Daily Calorie Target_____ cal What this means:** This is the number of calories per day that will move you toward your goal at a sustainable rate. Your meal plan is built around this number. **Step 2: Your Macro Targets** MacroGrams/DayCalories/Day% of Total Protein_____g_____ cal_____% Carbohydrates_____g_____ cal_____% Fats_____g_____ cal_____% **Total_____ cal100% Why these numbers?**

- ☐ **Protein at _____g:** This is set at approximately [X]g per kg of body weight. Protein supports muscle recovery, keeps you full, and preserves lean mass during fat loss. This is the most important macro to hit consistently.
- ☐ **Carbohydrates at _____g:** Carbs fuel your training sessions and your brain. Your target accounts for your training frequency ([X] days/week) and intensity. On heavier training days, carbs are your ally — not your enemy.
- ☐ **Fats at _____g:** Fats support hormone production, joint health, and satiety. Your target ensures adequate hormonal function while leaving room for the carbs and protein you need.

Step 3: Your Compliance Targets

Don't aim for 100%. Aim for consistency.

MetricTargetYour Actual (Week 1) Meals following the plan per week15 out of 21 (70%+)_____ Days hitting protein target (+/- 15g)5 out of 7_____ Days hitting calorie target (+/- 150 cal)5 out of 7_____ Meal preps completed1 per week_____ **The 80% Rule:** If you hit your targets 80% of the time, you will see results. The remaining 20% is for life — restaurants, social events, the occasional slice of pizza. Your plan accounts for this. Do not chase perfection.

Template 8: Grocery Shopping Guide by Budget Tier

For clients who are concerned about grocery costs. Tailor meal plans to their budget reality. **Grocery Shopping Guide: Eating Well at Every Budget**

Your meal plan is built to be flexible across different budgets. Use this guide to make smart choices at the store without blowing your budget or sacrificing nutrition.

Budget Tier 1: Tight Budget ($40-60/week for one person)

Strategy: Buy in bulk. Use frozen produce. Choose cheaper protein sources. Plan for leftovers. **Best Protein Sources:**

- ☐ Eggs (the best value protein available: ~$0.25/egg, 6g protein each)
- ☐ Canned tuna ($1-2 per can, 20-25g protein)
- ☐ Chicken thighs (bone-in, skin-on: cheaper than breast, more flavor)
- ☐ Dried lentils and beans ($1-2 per bag, makes 6-8 servings)
- ☐ Cottage cheese (high protein per dollar)
- ☐ Ground turkey (buy in bulk, freeze portions)

Best Carb Sources:

- ☐ Rice (buy the biggest bag you can afford — cost per serving drops dramatically)
- ☐ Oats (bulk oats, not instant packets)
- ☐ Potatoes and sweet potatoes (one of the cheapest whole foods per calorie)
- ☐ Bananas (usually under $0.25 each)
- ☐ Bread (whole grain, store brand)

Best Vegetable Sources:

- ☐ Frozen vegetables (same nutrition as fresh, half the price, zero waste)
- ☐ Cabbage (one of the most nutrient-dense vegetables per dollar)
- ☐ Carrots (cheap, versatile, last for weeks)
- ☐ Canned tomatoes (base for dozens of recipes)
- ☐ Onions and garlic (flavor foundations that cost almost nothing)

Budget Shopping Rules:

- ☐ **1.** Buy store brand — always. The nutrition is identical.
- ☐ **2.** Check the unit price, not the sticker price. Bigger packages are almost always cheaper per serving.
- ☐ **3.** Frozen produce is your best friend. It's picked at peak ripeness and flash-frozen. No waste.
- ☐ **4.** Cook in batches. Making 4 servings of rice costs almost the same as making 1.

Template 9: Kitchen Setup Checklist for Meal Prep

Send this to clients who are new to structured cooking. Removes the "I don't have the right equipment" excuse. **Kitchen Setup Checklist: Everything You Need for Meal Prep**

You don't need a professional kitchen to follow your meal plan. Here's what you actually need, organized from essential to nice-to-have.

Must-Have (you can't follow the plan without these):

- ☐ **One good knife.** A chef's knife or santoku knife. This is the only kitchen tool that truly matters. A sharp knife makes everything faster and safer. If you buy one thing, buy this.
- ☐ **One cutting board.** Plastic or wood, large enough to chop vegetables comfortably.
- ☐ **One large non-stick pan.** For cooking proteins, stir-fries, eggs — 80% of your cooking happens here.
- ☐ **One large pot.** For boiling rice, pasta, soups, and batch-cooking grains.
- ☐ **Measuring cups and spoons.** For portion accuracy in the first few weeks. After that, you'll eyeball it.
- ☐ **A kitchen scale.** $10-15, and it's the most accurate way to portion proteins. Weighing your chicken breast takes 5 seconds and eliminates guesswork.
- ☐ **Food storage containers.** 10-15 containers in 2-3 sizes. Glass is better (microwave-safe, no staining), but plastic works fine. These are your meal prep lifeline.
- ☐ **A baking sheet.** For sheet-pan dinners, roasted vegetables, and baked proteins. Line with foil for zero cleanup.

Strongly Recommended (makes meal prep significantly faster):

- ☐ **A slow cooker or Instant Pot.** Set it and forget it. Bulk-cook proteins, soups, stews, and chili with almost zero active time. The Instant Pot is the single best purchase for time-pressed meal preppers.
- ☐ **A blender.** For smoothies, protein shakes, and sauces. Doesn't need to be expensive — a $30 blender handles everything your plan requires.
- ☐ **An air fryer.** Crisps food without oil. Great for quick proteins and vegetables. Not essential, but once you have one, you'll use it daily.

Nice-to-Have (quality-of-life upgrades):

- ☐ **A rice cooker.** If you eat rice frequently, this removes all guesswork. Set it and perfect rice every time.
- ☐ **Silicone spatulas and tongs.** For stirring, flipping, and serving without damaging non-stick surfaces.
- ☐ **A garlic press.** Saves 2 minutes every time a recipe calls for garlic. Small thing, big time saver.
- ☐ **Reusable zip-lock bags.** For freezing pre-portioned proteins and batch-cooked meals.

You Do NOT Need:

- ☐ A stand mixer (unless you're baking, which isn't in most meal plans)
- ☐ A food processor (a knife handles everything in your plan)
