Meal Plan Pricing & Packaging Guide

How to Price Nutrition Coaching, Bundle with Training, and Create Recurring Revenue

EvoFit Meals

How to Price Nutrition Coaching, Bundle with Training, and Create Recurring Revenue

Before You Read This

Most trainers who add nutrition services either undercharge dramatically (because they feel like meal plans "aren't worth that much") or price randomly (because they copied someone on Instagram without understanding the math). Both lead to the same place: frustration, burnout, and eventually dropping the service.

Pricing nutrition is different from pricing training sessions. Sessions are time-bound — you trade an hour for money. Nutrition services deliver ongoing value without requiring your physical presence every time. That changes the math and it should change how you think about pricing.

This guide walks you through the calculation, gives you regional benchmarks, provides three ready-to-use package templates, and teaches you the pricing psychology that makes clients choose the option you want them to choose.

Section 1: The Pricing Calculator

Step 1: Know Your Time Investment Per Client

Before you set a price, you need to know what each nutrition client actually costs you in time.

Initial setup (first week): TaskTime Review dietary questionnaire and forms15-20 min Calculate macros and calorie targets10-15 min Build meal plan in EvoFit Meals15-30 min Review and customize plan10-15 min Deliver plan and explain it to client15-20 min **Total initial setup65-100 min Monthly ongoing:** TaskTime Plan updates/adjustments (2-4 per month)20-40 min Monthly check-in call20-30 min Responding to questions/messages15-30 min Progress review and macro adjustment10-15 min **Total monthly maintenance65-115 min**

So a nutrition client costs you roughly 1-2 hours per month after the initial setup. That's the denominator in your pricing equation.

Step 2: Calculate Your Minimum Hourly Value

You already know your training session rate. Use that as your benchmark.

If your training rate is $80/session (60 minutes): Your minimum hourly value is $80. **If your nutrition work takes 1.5 hours/month per client:** Your minimum nutrition price is $80 × 1.5 = **$120/month**.

That's your floor. Go below it and you're earning less per hour for nutrition work than for training — which means every hour spent on nutrition is a hour you could have earned more training someone.

Step 3: Add Your Value Premium

Your floor is based on time. But nutrition services deliver value beyond your time:

- ☐ **The plan itself has intellectual value.** You calculated macros, selected recipes, built a structure. That knowledge and customization is worth something independent of the minutes it took.
- ☐ **Convenience value.** The client doesn't have to research, plan, shop, or figure anything out. You've eliminated hours of their weekly decision-making.
- ☐ **Outcome value.** Better nutrition leads to better results, which leads to longer client retention, which leads to more training revenue. The nutrition service makes your training service more valuable.

Add 25-50% above your floor to account for this value.

Using the example above: $120 floor x 1.35 = **$162/month** → round to **$165 or $175/month**

Step 4: Validate Against Your Market

Before finalising, check what others in your area and niche are charging for nutrition services. Here's how:

- ☐ **1.** Search "[your city] nutrition coaching" and note the top 5 prices
- ☐ **2.** Check what online nutrition coaches in your niche charge
- ☐ **3.** Ask in trainer communities what others charge for meal plans
- ☐ **4.** Look at nutrition apps and meal plan delivery services for the "automated" baseline

Section 2: Regional Benchmarks

These benchmarks are for personal trainers offering nutrition services, not registered dietitians or clinical nutritionists. Clinical rates are typically 20-40% higher.

Major Metro Markets (New York, LA, San Francisco, Chicago, Miami, Boston, Seattle, DC)

ServiceTypical RangePremium Range One-off meal plan (no ongoing)$150 - $300$300 - $500 Monthly meal plan service$150 - $300/month$300 - $500/month Monthly nutrition coaching (plan + check-ins)$200 - $400/month$400 - $700/month Training + nutrition bundle add-on$100 - $200/month on top of training$200 - $350/month

Mid-Size Cities (Denver, Austin, Nashville, Portland, Minneapolis, Atlanta, Phoenix, Charlotte)

ServiceTypical RangePremium Range One-off meal plan (no ongoing)$100 - $200$200 - $350 Monthly meal plan service$100 - $200/month$200 - $350/month Monthly nutrition coaching (plan + check-ins)$150 - $300/month$300 - $500/month Training + nutrition bundle add-on$75 - $150/month on top of training$150 - $250/month

Small Cities and Rural Areas

ServiceTypical RangePremium Range One-off meal plan (no ongoing)$75 - $150$150 - $250 Monthly meal plan service$75 - $150/month$150 - $250/month Monthly nutrition coaching (plan + check-ins)$100 - $200/month$200 - $350/month Training + nutrition bundle add-on$50 - $100/month on top of training$100 - $175/month

Online-Only Nutrition Services

ServiceTypical RangeNotes One-off custom meal plan$75 - $200Single delivery, no ongoing support Monthly plan + messaging support$100 - $250/monthMost common online model Monthly plan + weekly check-ins$200 - $400/monthHigher touch, higher retention Group nutrition coaching (4-8 clients)$50 - $100/month per personLower per-client rate but scalable

Factors That Push Your Price Up

- ☐ Nutrition certification (Precision Nutrition, ISSA Nutrition, NASM CNC)
- ☐ Specialization (sports nutrition, contest prep, gut health, hormonal nutrition)
- ☐ Proven client results with documented outcomes
- ☐ Private studio or premium brand positioning
- ☐ Personalized macro adjustments (not just template plans)
- ☐ Integration with training program (synced periodization)

Factors That Push Your Price Down

- ☐ No nutrition-specific credential
- ☐ Template-based plans with minimal customization

Section 3: Three Package Templates

Package 1: The One-Off Meal Plan

What it is: A single, customized meal plan delivered as a one-time purchase. No ongoing coaching, no monthly check-ins. The client gets their plan and runs with it. **Best for:** Clients on a budget, clients who want to "try before they commit," or as a lead-in product for your monthly service. **What's included:**

- ☐ Initial questionnaire and preference review
- ☐ 7-day customized meal plan (built in EvoFit Meals)
- ☐ Full recipes with portions and macro breakdowns
- ☐ Consolidated shopping list
- ☐ Meal prep guide for the week
- ☐ One round of revisions within 7 days

What's NOT included:

- ☐ Ongoing plan updates
- ☐ Monthly check-ins
- ☐ Message support
- ☐ Macro adjustments based on progress

Pricing formula: Your hourly rate x 2 hours (average time to build and deliver) **Example pricing:**

- ☐ Small market: $100 - $150
- ☐ Mid market: $150 - $250
- ☐ Major metro: $200 - $350

How to position it:

> YOU
> "This is a great starting point if you want to see what a customized plan looks like for your goals. You'll get a full week of meals, all the recipes, and your shopping list. It's designed to be something you can follow immediately. If you love it and want ongoing plans and coaching, we can upgrade to my monthly service anytime."

The strategic play: The one-off plan is your gateway drug. Price it low enough that it feels like an easy yes, but deliver it at a quality that makes them want the monthly service. 40-60% of one-off plan clients upgrade within 30 days if the plan is good.

Package 2: Monthly Nutrition Service

What it is: Ongoing customized meal plans with regular updates and a monthly check-in.

Section 4: Pricing Psychology

The Anchor Effect

When you present three options, the client doesn't evaluate each one independently. They compare them. This is called anchoring, and it's the most powerful pricing tool you have.

How to use it:

Always present your packages in this order:

- ☐ **1. One-off plan** (lowest price, least value)
- ☐ **2. Monthly service** (middle price, best value for most clients) — **this is the one you want them to buy**
- ☐ **3. Training + nutrition bundle** (highest price, maximum value)

The one-off plan makes the monthly service look like a deal. The bundle makes the monthly service feel accessible. Most clients land on the middle option — which is exactly where you want them.

Never present just one option. A single option creates a yes/no decision. Three options create a "which one?" decision. "Which one?" converts at a dramatically higher rate.

The "Anchor High" Strategy

Start every pricing conversation by mentioning the bundle first.

> YOU
>
> "My most comprehensive option is the training + nutrition bundle at $[highest price]. That includes everything — your training sessions, a fully customized meal plan, and integrated nutrition coaching. For clients who want nutrition only, my monthly service is $[middle price], which includes bi-weekly plans, a monthly check-in, and messaging support. And if you just want to try a single custom plan, I do those for $[lowest price]."

By stating the highest price first, you've anchored the client's perception. Everything after that sounds more affordable by comparison. The monthly service — your target product — now feels like a reasonable investment rather than an expense.

Price Presentation Rules

Rule 1: Always quote the package price, not the per-meal price.

"$175/month" is how you present it. Not "$5.83 per day" or "$0.97 per meal." Per-meal pricing commoditises your service and invites comparison with grocery costs.

Rule 2: State the price once, confidently, and move immediately to value.

"The investment is $175 per month. That includes your customized plan every two weeks, all the recipes and shopping lists, a monthly check-in with me, and messaging support. Based on your goal of [X], I think we'll start seeing real changes within the first 3 weeks."

Rule 3: Never apologize for your price.

Don't say "I know it's a lot" or "I understand it's an investment." Those phrases signal that you think your price is too high. If you think it's too high, the client will too.

Rule 4: Use "investment," not "cost."

"The investment is $175/month" frames the money as something that produces a return. "The cost is $175/month" frames it as an expense. Words matter.

Section 5: Recurring Revenue Architecture

Why Recurring Beats One-Off

One-off meal plans are good for lead generation. Monthly services are good for building a business. Here's the math:

One-off model:

- ☐ You sell 4 plans per month at $150 each = $600/month
- ☐ You need to find 4 new customers every month
- ☐ No compounding — if you stop selling, revenue stops

Monthly model:

- ☐ Month 1: 4 clients at $150/month = $600
- ☐ Month 2: 4 existing + 3 new = 7 clients = $1,050
- ☐ Month 3: 7 existing + 3 new = 10 clients = $1,500
- ☐ Month 6: ~18 clients (assuming 85% retention) = $2,700
- ☐ Month 12: ~28 clients = $4,200

Monthly recurring revenue compounds. Each new client you add builds on the base you already have. After 6-12 months, you can stop actively selling and still have a substantial revenue stream.

The Retention Equation

Recurring revenue only works if clients stay. The industry average for nutrition coaching retention is 3-4 months. Your target should be 6+ months.

What drives retention: FactorImpact Regular check-ins+40% retention vs. no check-ins Visible results within 30 days+50% retention Plan variety (new recipes regularly)+25% retention Responsive communication+30% retention Training integration (bundled clients)+60% retention

The single biggest retention lever is the monthly check-in. Clients who feel seen and supported stay. Clients who receive a plan and hear nothing for a month leave.

Building Your Recurring Revenue Dashboard

Track these monthly:

MetricFormulaTarget Monthly Recurring Revenue (MRR)Sum of all active monthly nutrition clientsGrowing month-over-month Client countTotal active nutrition clientsGrowing Average Revenue Per Client (ARPC)MRR / client count$125+ Churn rateClients lost / clients at start of monthUnder 15% Net new clientsNew clients - churned clientsPositive Lifetime Value (LTV)ARPC x average client tenure (months)$750+ **The magic number:** When your monthly nutrition churn drops below 10%, your base is growing almost entirely from new client additions. That's when the compounding effect really kicks in.

Upsell Paths Within Nutrition

Section 6: Common Pricing Mistakes

Mistake 1: Pricing Based on How Long the Plan Takes to Generate

With EvoFit Meals, you can generate a complete meal plan in minutes. That doesn't mean the plan is worth "5 minutes of work." The value is in the customization, the expertise behind the macro calculations, the food selection, and the time the client saves. Price on value, not on production time.

Mistake 2: Matching App Prices

Meal planning apps charge $10-30/month for generic plans. You're not an app. You're a human who knows this specific client, their goals, their training program, and their life. The comparison is irrelevant. Don't address it unless the client brings it up — and if they do, the response is simple: "An app gives you a template. I give you a plan built specifically for you, adjusted based on your progress, with a real person you can ask questions to. They're different products."

Mistake 3: Free Nutrition "Included" with Training

Some trainers throw in nutrition advice for free as a training perk. This devalues the service, creates an expectation that nutrition help should be free, and makes it nearly impossible to charge for it later. If you want to include basic nutrition tips in training — fine. But a structured meal plan service should always be a separate, paid offering.

Mistake 4: Annual Discounts That Kill Cash Flow

Offering a big annual discount (e.g., "$150/month or $1,200/year — save $600!") sounds generous, but it tanks your monthly cash flow and locks you into a rate for 12 months. If you want to incentivize commitment, offer a modest 3-month or 6-month discount (10-15%) instead.

Mistake 5: Not Raising Prices

Your first price is your launch price, not your forever price. Review and raise prices every 12 months as you add clients, collect testimonials, and improve your service. Existing clients get 30 days notice and a loyalty lock-in option. New clients pay the new rate immediately.

Your Pricing Worksheet
