CHAPTER ONE

01

Why Keto Works

The Science of Ketosis

When carbohydrate intake drops below 20-50g per day, the body depletes glycogen stores within 24-72 hours. The liver then begins converting fatty acids into ketone bodies — beta-hydroxybutyrate (BHB), acetoacetate, and acetone — which become the primary fuel source for the brain and muscles. This metabolic state, called nutritional ketosis, fundamentally shifts how the body produces and uses energy, turning it into a fat-burning machine around the clock.

Fat-Adaptation Timeline

WEEK 1
Transition
Glycogen depletion, water weight drops 3-7 lbs. Possible "keto flu" symptoms.

WEEK 2
Adaptation
Ketone production ramps up. Energy stabilizes. Cravings start to fade.

WEEK 3
Optimization
Steady ketosis. Mental clarity improves. Appetite naturally decreases.

WEEK 4
Fat-Adapted
Efficient fat oxidation. Stable energy all day. Peak performance zone.

Who It's Best For

Weight Loss
Clients with 20+ lbs to lose. Keto suppresses appetite and accelerates fat loss without constant hunger.

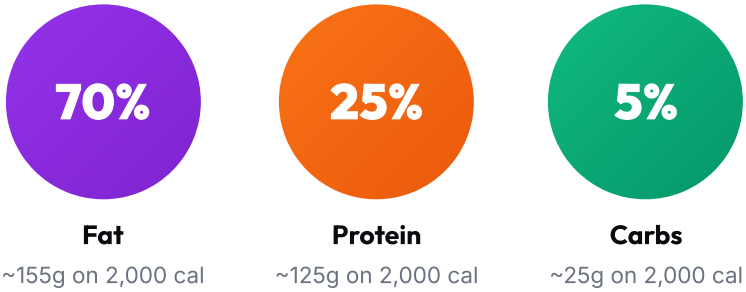
Insulin Resistance
Pre-diabetic or Type 2 diabetic clients. Keto dramatically improves insulin sensitivity and blood sugar control.

Neurological
Originally developed for epilepsy. Also shows promise for migraines, PCOS, and cognitive performance.

CHAPTER TWO

02

Keto Macros Made Simple



Calorie Ranges by Body Weight

BODY WEIGHT	CALORIES (CUT)	CALORIES (MAINTAIN)	FAT (G)	PROTEIN (G)	NET CARBS (G)
120 lbs / 55 kg	1,400	1,700	109–133g	88–106g	18–21g
140 lbs / 64 kg	1,550	1,900	121–148g	97–119g	19–24g
160 lbs / 73 kg	1,700	2,100	133–163g	106–131g	21–26g
180 lbs / 82 kg	1,900	2,300	148–179g	119–144g	24–29g
200 lbs / 91 kg	2,100	2,500	163–194g	131–156g	26–31g
220 lbs / 100 kg	2,250	2,700	175–210g	141–169g	28–34g

Net Carbs vs Total Carbs

Total Carbs – Fiber – Sugar Alcohols = Net Carbs

Net carbs are the only carbs that impact blood sugar and ketosis. Fiber passes through the digestive system without being absorbed, and most sugar alcohols (erythritol, xylitol) have minimal glycemic impact. Always read nutrition labels and calculate net carbs. Example: an avocado has 12g total carbs but only 3g net carbs after subtracting 9g of fiber. **Target: 20-25g net carbs per day** for reliable ketosis.

CHAPTER THREE

03

The Keto Food List

Print this page and give it to every keto client. Green means go, red means no.

✅ GREEN — Eat Freely

HEALTHY FATS

- ✓ Avocado & avocado oil
- ✓ Extra virgin olive oil
- ✓ Coconut oil & MCT oil
- ✓ Grass-fed butter & ghee
- ✓ Lard & tallow
- ✓ Macadamia nuts
- ✓ Pecans & walnuts
- ✓ Flaxseed & chia seeds

PROTEINS

- ✓ Beef (all cuts, grass-fed ideal)
- ✓ Chicken thighs & wings
- ✓ Pork belly & chops
- ✓ Bacon (uncured preferred)
- ✓ Salmon & sardines
- ✓ Shrimp, crab, lobster
- ✓ Eggs (whole, pasture-raised)
- ✓ Turkey (dark meat preferred)
- ✓ Lamb chops & ground lamb

VEGETABLES (LOW-CARB)

- ✓ Spinach & arugula
- ✓ Broccoli & cauliflower
- ✓ Zucchini & yellow squash
- ✓ Asparagus
- ✓ Bell peppers (small amounts)
- ✓ Mushrooms (all varieties)
- ✓ Celery & cucumber
- ✓ Brussels sprouts
- ✓ Cabbage & bok choy

DAIRY (FULL-FAT)

- ✓ Heavy whipping cream
- ✓ Cream cheese
- ✓ Cheddar, mozzarella, brie
- ✓ Parmesan & gouda
- ✓ Sour cream
- ✓ Full-fat Greek yogurt (plain)

❌ RED — Avoid

SUGARS & SWEETENERS

- ✗ White & brown sugar
- ✗ Honey & maple syrup
- ✗ Agave nectar
- ✗ High-fructose corn syrup
- ✗ Candy, chocolate bars
- ✗ Soda & fruit juice
- ✗ Sports drinks & energy drinks
- ✗ Sweetened coffee drinks

GRAINS & STARCHES

- ✗ Bread (white, wheat, sourdough)
- ✗ Pasta & noodles
- ✗ Rice (white, brown, wild)
- ✗ Oats & cereal
- ✗ Corn & tortillas
- ✗ Potatoes & sweet potatoes
- ✗ Crackers & pretzels
- ✗ Chips (potato, tortilla)
- ✗ Pancakes, waffles, muffins

HIGH-SUGAR FRUITS

- ✗ Bananas
- ✗ Grapes & mangoes
- ✗ Pineapple & papaya
- ✗ Dried fruits (raisins, dates)
- ✗ Apples (high sugar per serving)
- ✗ Oranges & tangerines

HIDDEN CARB TRAPS

- ✗ BBQ sauce & ketchup
- ✗ Teriyaki & hoisin sauce
- ✗ Low-fat salad dressings
- ✗ Flavored yogurt
- ✗ Milk (lactose = sugar)
- ✗ "Low-fat" anything (added sugar)
- ✗ Most protein bars
- ✗ Baked beans & legumes

CHAPTER FOUR

04

7-Day Keto Meal Plan

Based on ~1,800 calories / day. Adjust portions up or down for your client's needs.

DAY	BREAKFAST	LUNCH	DINNER	SNACK
MON	3-egg omelet w/ cheddar, spinach & bacon 480 cal · 38F / 28P / 3C	Avocado chicken salad on butter lettuce wraps 520 cal · 40F / 32P / 5C	Pan-seared salmon w/ garlic butter asparagus 580 cal · 42F / 38P / 6C	Pecans (1 oz) + string cheese 260 cal · 22F / 10P / 3C
TUE	Keto coffee (butter + MCT) + 2 hard-boiled eggs 440 cal · 38F / 14P / 1C	Bunless bacon cheeseburger w/ avocado & side salad 560 cal · 44F / 34P / 5C	Grilled chicken thighs w/ creamy broccoli casserole 550 cal · 40F / 36P / 6C	Celery sticks w/ 2 tbsp almond butter 220 cal · 18F / 6P / 4C
WED	Cream cheese pancakes (2) w/ sugar-free syrup & bacon 460 cal · 36F / 22P / 3C	Tuna salad-stuffed avocado halves 490 cal · 38F / 30P / 5C	Beef stir-fry w/ zucchini noodles & coconut aminos 580 cal · 40F / 40P / 7C	Pork rinds + guacamole (2 tbsp) 240 cal · 18F / 12P / 2C
THU	Sausage & egg breakfast muffins (2) w/ cheese 470 cal · 36F / 28P / 2C	Cobb salad: chicken, bacon, egg, avocado, ranch 540 cal · 42F / 34P / 6C	Baked pork chops w/ sautéed mushrooms & butter 560 cal · 40F / 38P / 4C	Macadamia nuts (1 oz) + dark chocolate (85%+, 1 sq) 250 cal · 22F / 4P / 4C
FRI	Smoked salmon + cream cheese rollups w/ capers 420 cal · 32F / 26P / 2C	Pulled pork lettuce tacos w/ slaw & chipotle mayo 530 cal · 40F / 34P / 5C	Shrimp scampi w/ zucchini noodles & parmesan 520 cal · 36F / 38P / 6C	Cucumber slices + everything bagel cream cheese 200 cal · 16F / 6P / 3C
SAT	Keto waffles w/ whipped cream & berries (1/4 cup) 450 cal · 34F / 20P / 5C	Greek salad w/ grilled lamb, feta & olive oil dressing 550 cal · 42F / 32P / 6C	Ribeye steak w/ garlic butter & roasted Brussels sprouts 620 cal · 46F / 42P / 5C	Olives (10) + sliced salami 210 cal · 18F / 8P / 2C
SUN	Bacon, egg & cheese breakfast casserole 500 cal · 40F / 30P / 3C	Chicken Caesar salad (no croutons) w/ parmesan crisps 510 cal · 38F / 34P / 4C	Herb-crusted rack of lamb w/ cauliflower mash 590 cal · 42F / 38P / 6C	Walnuts (1 oz) + 2 slices prosciutto 240 cal · 20F / 10P / 2C

Daily Average: ~1,810 cal | 140g fat (70%) | 112g protein (25%) | 17g net carbs (4%) | Well within ketosis range

CHAPTER FIVE

05

Keto Meal Prep System

The Sunday 2-hour prep that sets your clients up for a week of effortless keto meals.

0:00 – 0:15 | Setup

Organize & Preheat

Preheat oven to 400°F. Lay out all containers (get 14 glass containers with lids). Wash and dry all vegetables. Set out cutting boards for raw meat and veggies separately. Pull all proteins from the fridge to take the chill off.

0:15 – 0:45 | Proteins

Batch Cook All Proteins

Oven: Sheet pan of chicken thighs (seasoned with salt, pepper, garlic powder, paprika) + bacon strips on a separate rack. **Stovetop:** Brown 2 lbs ground beef with taco seasoning (no sugar). **Also:** Hard-boil 12 eggs in a large pot. All proteins cook simultaneously.

0:45 – 1:15 | Vegetables & Sides

Prep Veggies & Fat Sources

Chop: 2 heads broccoli, 3 zucchini (spiralize or dice), 1 lb asparagus, 2 cups mushrooms. **Roast:** Broccoli and Brussels sprouts with olive oil at 400°F for 20 min. **Prep:** Wash and bag spinach/lettuce for salads. Slice avocados last (day-of) to prevent browning. Make a batch of guacamole with lime juice to extend freshness.

1:15 – 1:40 | Sauces & Assembly

Build Your Containers

Make: Batch of keto ranch dressing, garlic butter sauce, and chipotle mayo. **Assemble:** Pair one protein + one vegetable + one fat source per container. Label each container with the day and meal. Stack in the fridge in order: Monday front, Sunday back. Each container should hit roughly 450-600 calories.

1:40 – 2:00 | Snacks & Cleanup

Portion Snacks & Clean Up

Portion: Pre-bag 7 snack packs (1 oz nuts + cheese stick or deli meat). Fill a container with celery/cucumber sticks. Pre-portion cream cheese and almond butter into small containers. **Freeze:** Any extra cooked protein for the following week. Clean as you go — kitchen should be spotless by 2:00.

Container System

Use 28 oz glass containers with snap-lock lids for meals. Small 4 oz containers for sauces and dips. Silicone bags for snack portions. Glass prevents flavor transfer and reheats safely in microwave.

Storage & Freshness

Fridge (3-4 days): Cooked proteins, roasted veggies, hard-boiled eggs. **Freezer (2-3 months):** Extra ground beef, chicken thighs, breakfast casserole portions. Thaw overnight in fridge before eating.

CHAPTER SIX

06

Common Keto Mistakes

Five pitfalls trainers see again and again — and exactly how to fix each one.

1 Not Supplementing Electrolytes

Keto is a natural diuretic — the kidneys excrete more sodium, which pulls potassium and magnesium with it. Clients experience headaches, muscle cramps, fatigue, and dizziness in the first 1-2 weeks. Most blame the diet and quit, when the fix is simple supplementation.

Fix: 5,000mg sodium (salt food liberally + bone broth), 1,000-3,000mg potassium (avocado, spinach, supplement), 400mg magnesium glycinate before bed. This eliminates "keto flu" almost entirely.

2 Eating Too Much Protein

Clients think keto is "eat all the steak you want." But excess protein triggers gluconeogenesis — the body converts amino acids into glucose, which can spike insulin and kick them out of ketosis. This is the #1 hidden reason clients plateau after initial weight loss.

Fix: Protein should be 0.6-0.8g per pound of lean body mass. A 180 lb male at 25% body fat needs ~81-108g protein. Prioritize fattier protein cuts (thighs over breasts, ribeye over sirloin) and add fat sources to every meal.

3 Hidden Carbs Sneaking In

Sauces, condiments, and "health foods" are landmines. A single tablespoon of BBQ sauce has 6g carbs. Sugar-free products may contain maltodextrin (higher glycemic index than sugar). Even vegetables like onions and tomatoes add up fast when used generously.

Fix: Read every label for the first 2 weeks. Use the food list on Page 4. Stick to simple seasonings: salt, pepper, garlic powder, herbs. Make sauces from scratch (mayo, ranch, butter sauces) where you control every ingredient.

4 Not Tracking Food Intake

Many clients eyeball portions and assume they are in ketosis. Without tracking, most people underestimate carbs by 30-50% and overestimate fat intake. "Lazy keto" works for some veterans, but beginners need structure to learn proper portion sizes and carb counts.

Fix: Track everything in an app for the first 30 days (MyFitnessPal, Cronometer, or Carb Manager). Use a food scale for the first 2 weeks. After 30 days, most clients develop an intuitive understanding and can reduce tracking to spot-checks.

5 Giving Up During Adaptation

The first 7-10 days are the hardest. Energy drops, cravings spike, and the scale may stall (or even go up temporarily from water fluctuations after the initial drop). Clients panic and revert to carbs, resetting the entire adaptation process and never reaching the fat-burning benefits.

Fix: Set expectations upfront — warn clients about the adaptation period BEFORE they start. Schedule a check-in call on Day 3 and Day 7. Celebrate non-scale victories (reduced bloating, better sleep, steady

energy). Commit to a full 21-day trial minimum.

Ready to Automate Keto Meal Plans?

Stop building spreadsheets. EvoFitMeals generates personalized keto meal plans for every client in seconds — complete with macros, grocery lists, and prep instructions.

STARTER

$199

one-time payment

- ✓ Up to 10 active clients
- ✓ Keto + 3 other diet templates
- ✓ Auto-generated meal plans
- ✓ Macro & calorie calculations
- ✓ Client portal access
- ✓ Email support

MOST POPULAR

PROFESSIONAL

$299

one-time payment

- ✓ Up to 50 active clients
- ✓ All diet templates (keto, paleo, vegan, zone, etc.)
- ✓ Custom recipe library
- ✓ Branded client portal
- ✓ Grocery list generation
- ✓ Prep instructions per meal
- ✓ Priority support

ENTERPRISE

$399

one-time payment

- ✓ Unlimited clients
- ✓ All Professional features
- ✓ White-label branding
- ✓ API access
- ✓ Multi-trainer support
- ✓ Dedicated account manager
- ✓ Custom integrations
